Information systems and technologies for managing socio-economic processes in sectors of the economy : Collective monograph. Riga, Latvia : Baltija Publishing, 2023. 276 p.

ISBN: 978-9934-26-351-4

DOI: <https://doi.org/10.30525/978-9934-26-351-4>

The monograph reveals the theoretical, methodological and applied aspects of managing socio-economic processes in the sectors of the economy. It studies theoretical and methodological approaches to the formation and optimisation of economic processes on the following issues: use of information systems and IT technologies in the system of accounting and analytical support of enterprise management, improvement of economic processes in the sectors of economy, computer modelling of socio-economic processes in the context of global informatisation. The scientific positions, conclusions and recommendations presented have a sufficiently high degree of validity, since they are based on the processing of a wide range of general scientific and special methods of scientific knowledge.
