

CONTENTS

EXPERIMENTAL BOTANY

Chapter 1

Genetic concept of stabilization of <i>Cannabis Sativa</i> L. monoeciousness (Mishchenko S. V.)	2
1. The structure of generative organs, sex polymorphism of hemp and its genetic determination.....	5
2. Genetic concept of stabilization of monoeciousness in varieties, hybrids, self-pollinated lines and synthetic populations of industrial hemp.....	11

ECOLOGY

Chapter 2

The principle of thermodynamic duality as a basis for the creation of industrial waste in technological processes (Voloshin V. S., Burko V. A.)	32
1. About one feature of the principle of thermodynamic duality, as a reason for the appearance of industrial waste.....	34
2. The generation of waste and the theoretical minimum of waste in the production process.....	40

Chapter 3

Innovative technologies and approaches in humanitarian demining: analysis of scientific publications and modern solutions using VOSviewer (Herasyanchuk L. O., Valerko R. A., Patseva I. H.)	53
1. Analysis of the Web of Science Core Collection scientometric database for the query “humanitarian demining”.....	56
2. Results of visualization of data from the Web of Science bibliographic database using VOSviewer.....	58
3. Cluster analysis.....	60

Chapter 4

Allelopathy as a key factor of biocenotic interactions in cultural biogeocenoses (Hnatiuk N. O.)	77
1. The essence, mechanisms and regularities of the manifestation of the allelopathic interaction of plants.....	79
2. The ecological role of plant secretions in the functioning of agrophytocenosis.....	87

Chapter 5

Strategic prospects for increasing the economic efficiency of land use mechanisms in Ukraine

(Kalinichenko Z. D.)	112
1. Basic provisions of land law and development of land relations in Ukraine	114
2. Regarding the policy of improving the land market in order to increase the export potential	117
3. Evolution of state policy regarding land and program measures to improve the effectiveness of reforming land ownership relations	122

Chapter 6

Investment strategies for conservation and restoration of natural resources

in Ukraine (Kvasnii L. G., Voloshanska S. YA., Drozd I. F.)	136
1. The importance of investing in the conservation and restoration of natural resources	136
2. Foreign experience of investing in the restoration of natural resources	140
3. Prospects and strategic directions	142

Chapter 7

Consequences of the war in Ukraine for water management and the fishing industry

(Novitskyi R. O., Hapich H. V.)	148
1. Ukraine's provision of water resources and the impact of the war	150
2. The impact of military operations on irrigated agriculture	153
3. Losses of the fishing industry of Ukraine as a result of military actions	155
4. Losses of ecosystem services of the Kakhovske Reservoir	160
5. Prospects for restoration of water supply for the south-eastern regions of Ukraine	161

Chapter 8

The impact of illegal dumps and landfills on the environment in the coastal protection zone of the Oril River (Omelych I. Yu., Savotchenko O. M., Neposhyvailenko N. O.)

(Omelych I. Yu., Savotchenko O. M., Neposhyvailenko N. O.)	169
1. Analysis of the latest research	170
2. Research methods	175
3. Results of the research	178
4. Recommendations for improving the environmental safety of the Oril River coastal protection zone	185

Chapter 9

Assessment of the impact of environmental and socio-economic factors on the formation of internal irradiation dose among the population of Ukrainian Polissia in the long-term period following the Chernobyl accident (Raichuk L. A., Shvydenko I. K., Chobotko H. M.) 190

1. Identification of key trends in the formation of internal irradiation dose among the residents of Polissia, Ukraine, in the long-term period after the Chernobyl accident..... 192
2. Identification of key factors influencing the formation of internal irradiation dose among the population of Ukrainian Polissia..... 198
3. Mathematical support for modeling the internal irradiation dose for the population of Ukrainian Polissia 204

Chapter 10

Regional management of freshwater resources in conditions of sustainable development (Serbov M. H., Hulievaty V. V., Kharchevnikov M. I.) 211

1. Strategic vectors and key imperatives of the innovative model of regional management of freshwater resources..... 212
2. Investment dominants of implementation of the innovative model of sustainable use of freshwater resources of the region..... 223
3. Improvement of freshwater resource management models on an innovative basis in conditions of sustainable development..... 231

Chapter 11

Quality Indicators of Small Rivers' Waters: Assessment Methodology and Environmental Challenges (Skyba G. V., Kireitceva H. V., Tsyhanenko-Dziubenko I. Yu.) 251

1. Prerequisites for the Problem Emergence and Problem Formulation..... 252
2. Methods for Monitoring the Current State of Inland Surface Waters 254
3. Information about Natural Conditions of the Kamianka River and the Teteriv River..... 258
4. Comprehensive Environmental Assessment of the Teteriv River near Zhytomyr 260
5. Water Quality Research in the Kamianka River Using Phytoindication Method..... 265

BIOLOGICAL RESEARCH

Chapter 12

ASPECTS OF APPLICATION OF MEDICINAL PLANTS OF THE GENUS JUNIPERUS IN INDUSTRIAL PHARMACY

(Hryhorenko A. H., Konechna R. T.).....	274
1. Botanical characteristics, distribution and chemical composition of plants of the <i>Cupressaceae</i> family.....	276
2. Pharmacological action, application and preparations based on plants of the <i>Cupressaceae</i> family.....	281
3. The current state of research on plants of the genus <i>Juniperus</i>	285

Chapter 13

The role of medicinal plants in correcting metabolism during an unhealthy diet

(Lieshchova M. A.)	295
1. The problem's prerequisites emergence and the problem's formulation	298
2. The effect of some medicinal plants on the body weight of rats and on some of their internal organs in the context of a high-fat diet.....	319
3. Effect of medicinal plants on blood biochemical parameters in rats fed a high-fat diet	330
3.1. Effect on protein and mineral metabolism	330
3.2. Effects on carbohydrate and lipid metabolism.....	341
3.3. Effect on blood enzyme activity	353

Chapter 14

Fundamentals of Lactose-Free Dairy Production, Health Aspects, and Market Trends (Stanhrít A. A., Buchkevych I. R., Kurka M. S.)

.....	380
1. Health aspects of lactose-free dairy products	381
2. Production of lactose-free dairy products.....	383
3. Market development of lactose-free dairy products	386
4. Labeling of lactose-free products.....	389

CHEMISTRY

Chapter 15

BIOMATERIALS FOR MEDICAL PURPOSES PROGRESS PARALLEL WITH THE DEVELOPMENT OF CIVILIZATION

(Kichura D. B., Sobechno I. B.)	395
1. "Biomaterials" and civilization	397
2. The era of the "hero-surgeon"	404
3. New biomaterials and engineering devices.....	413

Chapter 16	
NEW PRODUCTS OF BIOINDUSTRY (Kichura D. B.)	422
1. “Old” and “new” biotechnology	423
2. “Good gnomes” in the household	424
3. Enzymes “on tether”	426
4. Biotechnology for sweet tooth	428
5. Microbes are like seasoning in soup	430
6. Genetically modified food products	432
7. Genetically modified food – how safe is it?	439
8. A new “green revolution”?	441

PHYSICAL AND GEOGRAPHICAL RESEARCH

Chapter 17	
The current state of land use in the Zabolotsiv territorial community of Zolochiv district, Lviv region (Voitkiv P. S., Ivanov Ye. A.)	447
1. Geographical and natural conditions of land resources	448
2. Anthropogenic pressure on land resources	449
3. Current state of land use	451
4. Current state and prospects of land use	465
5. Measures to improve the ecological condition of land resources	469

Chapter 18	
Lake sapropels of the North-Western region of Ukraine: features of distribution, resources, prospects for use in balneological practice (Ilyina O. V.)	474
1. Resources and geospatial analysis of lake sapropels of the Volyn region	477
2. Lake sapropels of the Rivne region: resources, features of distribution	483

Chapter 19	
Features of the distribution of the number of days with snow cover on the territory of Ukraine during 1991-2020 (Pyasetska S. I.)	490
1. Months of the cold period of the year	493
2. Months of transitional seasons	512

GEOLOGY

Chapter 20

Unified criteria of classification systems

as a tool for resource management and investment analysis of mineral deposits (subsoil areas) (Lytvyniuk S. F.).....520

1. Primary goals of classification systems522
2. Classification markers.....523
3. Categories, classes and groups of reserves and resources524
4. Comparability (harmonization).....528

Chapter 21

The main geological factors of gas-bearing capacity and the extraction potential

of promising areas for gas and coal deposits

of the Lviv-Volyn coal basin (Matrofailo M. M.,

Buchynska I. V., Poberezhskiy A. V.).....534

1. The main features of the geological structure of the basin536
2. Distribution of hydrocarbon gases in carboniferous deposits of the basin...543
3. The influence of the main geological factors on the distribution of gases in coal seams and coal-bearing rocks 545
4. Mining potential of promising areas for gas and coal deposits of the Lviv-Volyn coal basin 550

ENVIRONMENTAL HEALTH AND FOOD QUALITY

Chapter 22

Holism of science and education about natural health, food quality, technology and food

(Vigera S. M., Kliuchevych M. M., Kovalchuk R. L.)561

1. Identify the background of the problem and formulate the problem 561
2. Holism about the health of nature and the quality of food resources565

FLORA AND VEGETATION

Chapter 23

Antioxidant properties of the medicinal plants

of Lamiaceae family

(Lupak O. M., Voloshanska S. Ya.)574

1. Materials and methods of the research576
2. Results of the research and their discussion579
