CONTENTS

SECTION 1. Preparation of future primary school teachers for the formation of students' technological culture (Kotelyanets N. V.) 1
1. Didactic principles of labor training of primary school students 2
2. The structure and content of students' technological culture 5
3. Preparation of future primary school teachers for the formation of students' technological culture 11

SECTION 2. Higher education in the context of war and post-war reconstruction of Ukraine (Lavreniuk V. V.) 24
1. Information and communication technologies in the modern education system 25
2. Patriotic education and spiritual development of the individual 33

SECTION 3. Communicative approach of teaching English in the paradigm of European integration (Leleka T. O.) 40
1. The problem's prerequisites emergence and the problem's formulation 42
2. The analysis of existing methods for solving the problem and formulating a task for the optimal technique development 46

SECTION 4. The results of research and experimental work on the identification of the effectiveness of the organization of methodical work at the National Academy of Sciences (Maydanenko S. V.) 71
1. The problem's prerequisites emergence and the problem's formulation ... 72
2. The results of research and experimental work on the identification of the effectiveness of the organization of methodical work at the National Academy of Sciences 75
3. Indicators of levels of readiness of managers and teachers to organize methodical work 87

SECTION 5. Sustainable development of land use in urban agglomerations: training of specialists in the field of land cadastre (Malashchuk O. S., Novakovska I. O., Skrypnyk L. R.) 94
1. The role of the land cadastre in the sustainable development of urban agglomerations 95

2. Training specialists in the field of land cadaster to ensure sustainable development 103

SECTION 6. Relevance of integrating crypto exchange business and tourism: professional competencies and skills of specialists in the context of modern challenges (Melikh O. O., Kalmykova I. S.) 115
1. The problem's prerequisites emergence and the problem's formulation 116
2. The analysis of existing methods for solving the problem and formulating a task for the optimal technique development 119
3. Methodology for assessing risks in cryptocurrency-enabled tourism companies: a comparative approach 128

SECTION 7. Transformation of engineering thinking of complex systems designer (Mygal G. V.) 135
1. The problem of the human factor in complex systems. The human factor at the center: safety, sustainability, and adaptation to the future 138
2. Transforming the designer's mindset to create viable systems 144
2.1. Design thinking is the path to creating viable systems 144
2.2. Development of a new type of thinking – metaergonomic thinking 150
3. Transforming Education: Basic Concepts Necessary for Growing Engineering Maturity and Creating Viable Systems 151

SECTION 8. Current directions of intellectualization of the educational process management system (Mospan D. V.) 164
1. Formation of professional competence of future specialists in the context of contextual education in higher education 165
2. The analysis of existing methods for solving the problem and formulating a task for the optimal technique development 179

SECTION 9. Intelligent Technologies in the Educational Process and Their Impact on the Quality of Mathematical Knowledge (Motailo A. P.) 194
1. Development of the latest intellectual technologies and their impact on the quality of education 195
2. Analysis of the use of Computer Algebra Systems in the educational process and selection of the optimal software package for the study of mathematics 198
3. The use of CAS on the example of Maple in teaching and learning higher mathematics 203

SECTION 10. Distance learning in higher education institutions using digital technologies. Modern challenges (Nemtsova V. D., Poteiko P. I., Kolesnikova O. V.) 219
1. Advantages of distance learning: focus on digital technologies 220
1.1. Interactive platforms and learning management systems (LMS) 221
1.2. Artificial Intelligence and Adaptive Technologies 222
1.3. Використання віртуальної (VR) та доповненої реальності (AR) ... 223
1.4. Using Virtual (VR) and Augmented Reality (AR) 224
1.5. Blockchain technologies for data protection and increased transparency 225
2. Difficulties associated with the use of digital technologies in distance learning 225
2.1. Technical problems and limited access to technology 226
2.2. Lack of skills and digital literacy 226
2.3. Problems with motivation and self-organization 228
2.4. Problems with ensuring academic integrity 230

SECTION 11. Real estate investment analysis: integration into the educational process of specialists in the field of land cadastre (Novakovska I. O., Ishchenko N. F., Smolenska L.I.) 236
1. The role of investment analysis in ensuring sustainable economic development 236
2. The role of investment analysis in educational programs for training specialists in the field of land cadastre 244

SECTION 12. Organization of independent work of future teachers in the study of chemistry disciplines (Pliushch V. M.) 262
1. Didactic fundamentals of organizing students' independent work 264
2. Methodological system of complex independent work of future teachers in the study of chemistry disciplines 275

SECTION 13. Foreign language training of future hospitality professionals at higher education institutions (Pozdniakov O. V.) 289
1. Improving the level of foreign language communicative competence of hospitality students 291
2. Overcoming difficulties at simultaneous (sequential) learning of foreign languages by hospitality students 296

SECTION 14. Crisis environmental management in the education system of future professionals: relevance in wartime and post-wartime periods (Raichuk L. A.) 307
1. Environmental consequences of the Russo-Ukrainian war 308
2. The impact of military actions on protected areas and soils 308
3. Crisis environmental management as a tool for mitigating consequences 310
4. The role of adaptive leadership and communication in crisis conditions 318
5. Uncertainty and information challenges in crisis environmental management 319
6. Integrative approach to sustainable development and environmental policy 320

SECTION 15. A competent approach to teaching management disciplines in the conditions of the formation of “Industry 5.0” (Rossokha V. V.) 331
1. Prerequisites for teaching management disciplines based on a competent approach 331
2. The influence of “Industry 5.0” on the educational process in teaching management disciplines 338

SECTION 16. Peculiarities of the formation of psychophysical qualities of students by means of physical culture in the conditions of professional training (Samokhvalova I. Yu., Kharchenko S. M.) 348
1. Theoretical foundations of the distribution of training areas students of higher education 349
2. Determination of the effectiveness of the formation method psychophysical qualities of students in accordance with their future professional activity 356

SECTION 17. Training Future Specialists in the Field of Restorative Justice: Key Concepts, Domestic and International Implementation Experience, Philosophical Propedeutics in Pedagogy (Svietlichnyi I. V.) 367
1. The Basics of Philosophical Propedeutics for Educators 371
2. Preconditions and Genesis of the Development of Restorative Justice ... 373
3. Restorative Justice in International Legal Documents 377
4. Mediation and Agreements in Juvenile Criminal Proceedings: Preventing Juvenile Delinquency Through Restorative Justice 378

SECTION 18. Preparing Ukrainian social workers:
adapting higher education to wartime requirements
(Semigina T. V., Stoliaryk O., Yu., Slozanska H. I.) 387
1. Theoretical Framework and Research Methodology..... 389
2. Key Themes 393
3. Discussions 401

SECTION 19. Specifications of Training the Specialists
for Healthy Food Industry under the Blended Learning Conditions
(Simakhina G. O., Naumenko N. V., Kaminska S. V.) 411
1. Healthy Food Industry and the Need to Train the Specialists
of Principally New Generation 412
2. Advantages and Disadvantages of Blended Learning
(in Particular, the Distance Education as Its Constituent)..... 415
3. Professional Development of a Teacher as the Basis for Successful
Specialists Training in Higher Education Institutions 426

SECTION 20. Professional Training of Probation Specialists
Considering European Experience (Sirenko K. Yu.,
Dzhendzhero O. L., Dudka N. O.) 434
1. Key Areas of Specialization in Professional Training
for Probation Specialists 435
2. Modern Technologies in the Professional Training
of Probation Specialists 437
3. Harmonization of Professional Training for Probation Specialists
Considering European Experience 438
4. Strategic Directions for the Development of Professional Training 440

SECTION 21. International cooperation with European partners
in the process of reforming vocational education in Ukraine
(Soloviov K. O., Sofishchenko I. Ya.) 446
1. Problems of development and reform of the vocational
education system in Ukraine 446
2. Directions and prospects for the development of integration
cooperation Ukraine in the field of development and modernization
of vocational education..... 451
3. Economic effects of cooperation with European partners..... 455

SECTION 22. The teaching of higher mathematics in the context of preparing future engineering specialists for professional activity in wartime and post-war periods in Ukraine (Sulima O. V.) 462
1. The peculiarities of teaching higher mathematics to engineering students at a technical university during wartime 463
2. The prospects and challenges of teaching higher mathematics to future engineering professionals in a technical university in post-war times 469

SECTION 23. The role of coaching in the formation of professional thinking of specialists (Tishchuk O. A., Maievska O. M.) 481
1. Problems of professional thinking development..... 482
2. The role of coaching in the development of professional thinking 486
3. Coaching training..... 487

SECTION 24. Innovative processes in the reality of virtuum: ontological aspect (Kharchenko J. V., Kharchenko S. P.)..... 496
1. The phenomenon of virtuum as a metaphysical reality 497
2. The phenomenon of virtuum as a psychophysical reality 501
3. The phenomenon of virtuum as a reality of techno gnosis..... 506

SECTION 25. Developing speaking skills in university students using case technology (Khrystych N. S.)..... 519
1. Theoretical substantiation of the use of the case method as one of the types of interactive technologies in the development of students' speaking skills..... 520
2. Cases: types, functions and rules for their creation..... 531
3. System of exercises for case technology implementation 545

SECTION 26. Opportunities for Integrating Technology into the discipline of the psychology higher education landscape (Chadiuk O. M.) 555
1. The relevance of integrating technology into the discipline of the psychology higher education landscape 555
2. The integration of AI and VR into psychology education..... 557
3. Multidisciplinary Approaches and Sociological Implications of AI in Higher Education 560

SECTION 27. Professional training of future social workers
for preventive activities in the youth environment
(Chervonenko K. S.) 569
1. Social prevention and preventive activities
of social work professionals 572
2. Professional training of future specialists in the social sphere 577
3. Components and conditions of future social workers' readiness
for preventive activities 582

SECTION 28. Innovative pedagogical technologies
in the context of modern social challenges: tools for developing
critical thinking in online lectures on mathematical analysis
(Chkana Ya. O., Shyshenko I. V., Udovichenko O. M.) 590
1. Research into the possibilities of developing critical thinking
in the process of teaching mathematics 591
2. Features of online lectures on mathematical analysis
in new realities 593
3. Possibilities for using cloud-dased presentations to develop critical
thinking in online lectures on mathematical analysis 598

SECTION 29. Adaptation: concept and role in organization of distance
learning in wartime conditions (Shaikhlislamov Z. R.) 606
1. The concept of adaptation. The meaning and types of adaptation 606
2. Features of distance learning in wartime conditions 618

SECTION 30. The role of self-change processes
in personality formation of students of higher education
institutions (Shaumian O. H.) 631
1. The role of the self-change processes of students of higher
education institutions: pure hope and social loneliness 632
2. The role of self-change processes of students of higher education
institutions: social adaptability, listening, conflict personality 640
