

CONTENTS

SECTION 1. Role of Scientific Worldview in Developing	
Critical Thinking 1 (Burdonosova M. A.).....	1
1. Historical Variants of the Scientific Worldview	2
2. Formation of the Scientific Worldview in the Educational Process	6
3. Steps to Constructing a Scientific Worldview by students	8
 SECTION 2. The ethos of a scientist in the conditions of military	
conflicts: moral challenges and ethical responsibility	
(Vaksiytenko P. S., Skladan A. A.).....	14
1. Moral challenges of science in military conflicts:	
genesis and modern aspects	14
2. Ethical responsibility of a scientist: theoretical and practical approaches	22
 SECTION 3. Conceptualization of Chaos in Postmodern Philosophy	
and Post-Non-Classical Science: The Game of Sense and Nonsense	
(Honcharenko K. S.)	37
1. Concept of Chaos in Postmodern philosophy	39
2. A post-no-classic about chaos: order without order	41
 SECTION 4. Man in the lens of post-nonclassical science research	
(Grechkosiy R. M.)	48
1. The human problem in the classical scientific paradigm	49
2. Non-classical science about man and human things	52
3. The role of the theory of complex systems in human understanding	55
4. Man as a subject of study in the post-non-classical scientific paradigm	57
 SECTION 5. The method of analogy in the cognitive practices	
of European philosophical millennia: from antiquity to postmodernism	
(Dovhan A. O.)	64
1. Analogy of the primordially of social existence and its mythopoetic	
and speculative-theoretical images in ancient Greek culture	66
2. Speculative-scholastic variant of analogy	
in the Christian philosophical Middle Ages	73
3. Analogy in cognition as a reflection of the "reasonableness"	
of nature in the natural philosophy of the Renaissance	74
4. Materialism of the 17th-18th centuries about analogy	
in the cognition of nature	75
5. German idealist philosophy of the 18th–19th centuries about	
the role of analogy in the search for truth	78

SECTION 6. On the issue of the specificity of philosophical interpretation of natural scientific (synergetics) and socio-humanitarian (psychosynergetics) knowledge. Inter- and transdisciplinary research (Yershova-Babenko I. V., Malchenko V. V.).....	84
1. The problem of re-evaluation of classical epistemology in the 20th century	85
2. The intersection of Western and Eastern worldviews – chaos, order and synergetics.....	86
3. 70–90s – development of synergetics	91
SECTION 7. Historiosophical Aspect of State Building Processes in Ukraine of the XX–XXIst Centuries (Kyslyak L. N.)	99
1. The revolution of 1917–1921 of the 20th century Proclamation of the State Independence of Ukraine	100
2. Ukrainian War of Independence	108
3. The Ukrainian war of Independence.....	111
SECTION 8. Hybrid Reality: Challenges for Philosophy (Maksymiak T. H.)	126
1. Shared Myths as a Basis of Communication	127
2. Hybrid Reality	131
3. From Evidence to Virality: Science and Philosophy in the Digital Age	133
SECTION 9. The main subject of controversy around the evolutionary doctrine: Background and worldview conclusions (Matiushko B. K.).....	140
1. The subject of the dispute.....	141
2. The hidden basis of the evolutionists' point of view	143
3. Indicative worldview conclusions	148
SECTION 10. Metaphysics: a living or dead science? (Oblova L. A.)	153
1. The essence and understanding of metaphysics under the conditions of the affirmation of the anti-metaphysical project	154
2. The correlation between the practices of the sphere of metaphysics and the sphere of dialectics. Metaphysics of the face.....	160
SECTION 11. The Reasons for the Existence of Science, the Process of its Formation and Constitution (Pavlov V. L.)	170
1. Why does Society Needs Science? The Reasons for its Existence.....	172
2. From Pre – Science to Science.....	176

SECTION 12. «The world as substance and imagination» (Theatrologic Foundation of Western European Science at the Turn of the 16th–17th Centuries) (Savelieva M. Yu.).....	191
1. Etymology of Imagination	192
2. Phenomenology of Imagination	195
3. Theatrological Character of Substance	209
SECTION 13. The Experience of Integrating Science and Art in European and Chinese Cultural Traditions: Historical and Philosophical Analysis (Skovronskiy B. V.)	217
1. Integration of science and art in the European cultural tradition as a problem of representation of experience	218
2. Joseph Needham's Questions: Formation of Scientific Knowledge and Interaction with Art in the Chinese Cultural Tradition.....	239
SECTION 14. The philosophy of transhumanism and posthumanism in the textual reality by John Wyndham “ <i>Compassion Circuit</i> ” (Starostenko T. M., Laktina Yu. V.)	257
1. Posthuman studies and the philosophy of transhumanism.....	260
2. The Posthuman and Transhuman intertext in the work by John Wyndham “ <i>Compassion Circuit</i> ”.	266
SECTION 15. Scientific rationality in the context of the historical and philosophical process: traditions and modernity (Sukhodub T. D.)	274
1. «Other thinking» as a concept.....	275
2. Culture of rational thinking: directions of search	280
SECTION 16. The specifics of the philosophical interpretation of natural-scientific and socio-humanitarian knowledge. Interdisciplinary research. Science, technology, and engineering. Philosophy of artificial intelligence (Ushno I. M.)	287
1. Philosophy of Technology: Historical and Philosophical Context	288
2. From Image to Innovation: Philosophical Grounds of Artistic Thinking in Engineering Practice.....	296
3. Historical and philosophical retrospective of humanity`s dream of flying	304

SECTION 17. The crisis of multiculturalism in the European Union in the context of socio-cultural globalization (Chuprii L. V., Karavaiev V. S.)	317
1. Modern conceptual approaches to understanding multiculturalism.....	318
2. Experience in the development of multiculturalism in Germany	322
SECTION 18. Synergetics in technoscience: integration of science, technique and technologies (Chursinova O. Yu.).....	330
1. Synergetic innovation mechanisms: from “smart” systems to adaptive platforms	332
2. Technoscience as a new paradigm of innovative progress.....	334
3. Challenges and prospects of integrating science, technique and technologies	337
SECTION 19. Postmodern paradigm of science: challenges of the era of informatisation (Shakun N. V., Shcherbyna N. O.).....	343
1. Emergence of prerequisites of the problem and its formulation	344
2. Analysis of the main trends of the postmodern paradigm of science and the formulation of tasks for the optimal development of science in the context of informatisation	348
SECTION 20. The problem of the criteria of scientificity in the historical-philosophical dimension (Shevchuk S. F.)	357
1. The historical nature of the problem of scientific criteria	358
2. The modern understanding of the terms “exact” and “inaccurate” as criteria of scientificity	365
