

CONTENTS

MODERN AGRONOMY CHALLENGES

Chapter 1

Adaptive technologies for growing Tatar Buckwheat (<i>Fagopyrum tataricum</i>) (Averchev O. V., Nikitenko M. P.)	2
1. Vegetative stages of development of Tatar buckwheat according to BBCH...	3
2. Current state of cultivation of Tatar buckwheat (<i>Fagopyrum tataricum</i>) in Ukraine and the world	5
3. Adaptability of Tatar buckwheat to different climatic conditions	7
4. Technologies for growing Tatar buckwheat	10
5. Desiccation and combating grain shedding during the growing process	14
6. Biologization and environmental aspects of growing Tatar buckwheat	16
7. Useful properties of Tatar buckwheat for consumers and its use in nutrition ..	18

Chapter 2

Yield of maize (<i>Zea mays</i> L.) hybrids under the influence of seeding rate, grain moisture and conditions of the left-bank forest-steppe of Ukraine (Vanzhula D. V.)	28
1. Identifying the background of the problem and formulating the problem	31
2. Factors influencing the yield of modern maize hybrids.....	33
3. State of corn production in Ukraine and adaptability of hybrids to weather conditions in Poltava region	36
4. Materials, methods and research results	41

Chapter 3

Development of scientific foundations for obtaining bast fiber fillers for the production of technical textiles (Horach O. O., Lavrenko N. M.)	58
1. Global and domestic experience in the production of technical textiles and its application areas	59
2. Analysis of modern technologies for producing technical textiles at domestic and foreign enterprises	68

Chapter 4

Sustainable Solutions for Crop Cultivation in the Era of Climate Change (Lavrenko S. O., Serbinov A. B., Maksymov A. O.)	82
1. Smart Greenhouse Systems in Modern Tomato Cultivation.....	83
2. Sustainable corn production in the face of climate change	91

Chapter 5

Genetic control of cannabinoid content in *Cannabis sativa* L.

(Mishchenko S. V.)	103
1. Genetic concept of determining the traits of cannabinoid content.....	106
2. Correlations between cannabinoid compound	113
3. Hemp polyploids: genetics and expression cannabinoid traits	122

Chapter 6

Scenarios of Agricultural Production Activities on Radioactively Contaminated Lands of the Ukrainian Polissia under Post-War Recovery Conditions

(Raichuk L. A., Shvydenko I. K., Chobotko H. M.)	138
1. Radioactively Contaminated Agroecosystems of the Ukrainian Polissia: Climatic, Anthropogenic, and Military Determinants of Development	139
2. Rehabilitation of Radioactively Contaminated Agroecosystems of the Ukrainian Polissia: Innovative Strategies under Climate Change, War Consequences, and Sustainable Development.....	145
3. Adaptive Model Scenarios of Agricultural Production on Radioactively Contaminated Lands: Optimization under Climate Change, War Consequences, and Environmental Safety	147

INNOVATIVE TECHNOLOGIES IN CROP PRODUCTION

Chapter 7

Features of cultivation of microseed basil to the baby leaf phase in hydroponic systems of periodic flooding *Flood & Drain*

(Kovalov M. M.).....	159
1. Features of conducting research	161
2. Analysis of the basic parameters of climate support and their effect on morphometric parameters micro-retrieved basilica of Rutan variety	166
3. Impact of technological parameters of climatomalasure on growth and development of micro-retrieved basil variety of Rutan.....	177

Chapter 8

Comprehensive diagnostics of *Fusarium* wilt resistance traits in breeding-value forms of sweet pepper (*Capsicum annuum* L.)

(Kondratenko S. I., Pylypenko L. V., Tkalych Yu. V.).....	194
1. Problematic issues of creating <i>Fusarium</i> -resistant initial forms of sweet pepper for the needs of varietal and heterotic breeding	196
2. Methodical aspects of complex evaluation of resistance to <i>Fusarium</i> wilt of breeding-value forms of pepper at the level of cell selection in vitro and sporophytic and gametophytic offspring	199

3. Results of a comprehensive assessment of breeding-value forms of sweet pepper to Fusarium wilt	206
---	-----

Chapter 9

Improvement of agrologistics of field and energy crops production (Kopeletz B. V., Koval D. O., Kulyk M. I.)	220
1. Study of the prerequisites of the identified issues	226
2. Analysis of existing methods for solving the problem and formulation of the research task.....	232
3. Research results	234

Chapter 10

Biological technology of growing chick-pea (Korobko O. O., Gavrilenko V. S.)	247
1. Physiological and biochemical changes in plants during separate and integrated use of herbicides, plant growth regulators and microbial preparations.....	248
2. The effectiveness of the use of herbicides, plant growth regulators and microbial preparations in the sowing of leguminous crops, including chick-peas.....	253
3. The effect of herbicide, plant growth regulator and microbial preparation on chlorophyll accumulation	257
4. The influence of herbicide, plant growth regulator and microbial preparation on the formation of the area of the leaf apparatus	262
5. The influence of herbicide, plant growth regulator and microbial preparation on the dynamics of growth processes	266
6. Effect of herbicide, plant growth regulator, and microbial preparation on net photosynthetic productivity	270
7. Yield and quality of chick-pea grain under the effects of herbicide, plant growth regulator and microbial preparation	272

Chapter 11

The productivity of buckwheat in the Northern steppe of Ukraine (Mashchenko Yu. V., Sokolovska I. M.).....	284
1. The emergence of prerequisites and the formulation of the problem regarding buckwheat cultivation in the conditions of the Northern Steppe of Ukraine with the aim of increasing its productivity.....	286
2. Analysis of existing methods and tasks for optimizing elements of buckwheat cultivation technology and addressing issues to increase crop productivity in the northern Steppe of Ukraine	290
3. Analysis of Buckwheat Yield Depending on Fertilization Systems and Seed Inoculation with Biopreparations in the Conditions of Northern Steppe of Ukraine	293

4. The influence of fertilization systems and biopreparations on the quality indicators of buckwheat fruits in the conditions of the northern Steppe of Ukraine	297
5. The influence of fertilization systems and biopreparations yield of grain units, feed units, and digestible protein units from main and by-products of buckwheat in the conditions of the Northern Steppe of Ukraine.....	300
6. Analysis of the chemical composition of soil in crop rotations with different sets of crops depending on fertilization systems in the conditions of the Northern Steppe of Ukraine	304

Chapter 12

Modern methods for determining mycotoxins

(Midyk S. V., Iakubchak O. M., Taran T. V.).....315

1. Materials and methods of research.....	318
2. Assessment of the conformity of the methods for aflatoxin B ₁ and deoxynivalenol determination in grain and feeds by method of high-performance liquid chromatography	321

Chapter 13

Agroecological aspects of growing field peas (Nebaba K. S.)335

1. Structural elements of the pea crop depending on agroecological factors ...	337
2. Yield of pea grain depending on agroecological measures.....	342

Chapter 14

Sunflower: strategies and technologies for adaptive cultivation

under climate change conditions (Revto O. Ya., Maliarchuk A. S.) ...351

1. Retrospective and current trends in sunflower production in Ukraine and Kherson region	353
2. Analysis of weather conditions in Ukraine: trends, risks, and challenges...355	
3. Optimization of soil tillage technology for effective sunflower cultivation under climate change conditions	358
4. Sowing dates and seeding rates as factors in sunflower yield formation	361

Chapter 15

Synthesis of a system for automated control of technological parameters of the sunflower seed drying process

(Fedotova M. O., Didyk O. K., Zavoruyev R. S.).....370

1. Estimation of the change in the height of the fluidized bed of sunflower seeds according to the data on its final humidity	374
2. Compensation of delays of a grain dryer with a fluidized bed of the cascade type for drying sunflower seeds	383
3. Synthesis of the optimal structure of the controller of the automated system for regulating the technological parameters of drying sunflower seeds	386

4. Study of the influence of the control constraint on the structure and parameters of the transfer function matrix of the optimal controller	390
---	-----

Chapter 16

The effect of organic acids on microbody metabolism during the functioning of the glyoxylate cycle and gluconeogenesis in agricultural crops (Chechui H. F.)	399
---	------------

1. The participation of organic acids in the functioning of microbodies in the cells of the organism of agricultural crops in the process of their vital activity	401
2. The effect of organic acids on the criteria for ensuring the course of the glyoxylate cycle in glyoxysomes and oleosomes of agricultural crops	406
3. The effect of organic acids on the criteria for ensuring the course of gluconeogenesis in peroxisomes of agricultural crops	410

Chapter 17

Digital Transformation of Crop Production as a Strategy for Climate Change Adaptation (Shabatura T. S., Stepanova M. M., Yakovenko A. O.).....	420
---	------------

1. Digital Transformation as a Strategic Response to Climate Challenges in Ukraine’s Crop Production.....	421
2. Key Digital Tools for Climate Change Adaptation in Crop Production	424
3. Economic Efficiency of Digital Transformation in Crop Production: Global and Ukrainian Experience	428

Chapter 18

Directionality of microbiological processes in the rhizosphere of winter wheat under the influence of biological products Azotohelp® and Groundfix® (Yakovenko D. O., Boroday V. V., Bolokhovska V. A.) ..	434
---	------------

1. Identifying the background to the problem and formulating the problem ..	435
2. Analyze existing methods of solving the problem and formulate the task ..	437
3. Research conditions and methods	439
4. Research results and discussion.....	441

PLANT PROTECTION AND BIODIVERSITY

Chapter 19

Integrated Protection Systems for Cucumber Against the Two-Spotted Spider Mite (<i>Tetranychus urticae</i> Koch) in Greenhouse Cultivation (Dudchenko V. V., Markovska O. Ye., Mrynskyi I. M.).....	460
--	------------

1. Biological Control Methods for Managing the Two-Spotted Spider Mite (<i>Tetranychus urticae</i> Koch) on Cucumber in Greenhouse Production	462
2. Chemical Methods for Protecting Cucumber Crops in Greenhouses Against the Two-Spotted Spider Mite (<i>Tetranychus urticae</i> Koch)	467

Chapter 20

Phytosanitary status of lavandin (*Lavandula hybrida* Rev.) plantations in the conditions of the Southern Steppe of Ukraine (Markovska O. Ye., Dudchenko V. V., Stetsenko I. I.).....476

1. Species Composition of Segetal Vegetation and Weed Infestation in *Lavandula hybrida* Rev. Plantations.....478
2. Phytopathogenic Microbiota in Lavandin Plantations.....482
3. Monitoring of entomofauna in Lavandin plantations486

Chapter 21

Methods of controlling spruce scale insects (Hemiptera: Coccidae) in the north-eastern part of Ukraine (Melenti V. O., Stankevych S. V., Zabrodina I. V.)499

1. Harmfulness of spruce scale insects and measures to limit harmfulness500
2. Integrated approaches to protect *Picea* spp. from scale insects.....502

ECONOMIC AND SOCIAL ASPECTS IN AGRONOMY

Chapter 22

Formation of Human Resource Potential in Agricultural Enterprises of Lviv Region within the Human Resource Management System (Stefanyshyn O. B.).....517

1. Theoretical Foundations of Human Resource Potential Formation and Management518
2. Analysis of the Human Resource Potential in the Agricultural Sector of Lviv Region: Employment Dynamics, Wage Levels, Gender Aspects, and Economic Challenges521

INTERNATIONAL EXPERIENCE, FUTURE TRENDS AND PERSPECTIVES OF AGRONOMY DEVELOPMENT

Chapter 23

Peculiarities of land relations regulation: challenges, methods, mechanisms, and international experience (Sabii I. M., Martyniuk M. P., Berehovi O. L.).....538

1. Theoretical and methodological principles of land relations regulation539
2. Current state and problems of land relations development in Ukraine545
3. World experience of land relations regulation548
4. Prospects for improving land relations regulation in Ukraine taking into account world practices557
