

Table of Contents

INTRODUCTION.....	1
CHAPTER 1. AGROBIOLOGICAL POTENTIAL OF OILSEED RADISH.....	2
1.1. Origin, range and introduction of oilseed radish.....	2
1.2. Morphological portfolio of oilseed radish.....	15
1.3. Agrotechnological potential of oilseed radish.....	72
List of references to the Chapter 1.....	84
CHAPTER 2. EFFICIENCY OF OIL RADISH IN THE SYSTEM OF SOIL BIOFUMIGATION TECHNOLOGIES.....	90
2.1. Cruciferous plant species in the system of biofumigation as an innovative technology for the rehabilitation of degraded soils.....	90
2.2. Practical application of oilseed radish in soil biofumigation options.....	160
List of references for the Chapter 2.....	233
CHAPTER 3. OILSEED RADISH IN THE SYSTEM OF MULTI-SERVICE COVER CROP (MSCC) FOR REHABILITATION OF DEGRADED SOILS.....	252
3.1. Assessment of oilseed radish potential according to multi-service cover crop (MSCC) criteria.....	252
3.2. Potential of oilseed radish as a green manure crop.....	305
3.3. The effectiveness of the use of oilseed radish green manure in different variants of the technology of growing agricultural crops.....	359
List of references for the Chapter 3.....	500
CHAPTER 4. APPLICATION OF OILSEED RADISH FOR WEED CONTROL AND REDUCTION OF SEGETAL SOIL DEGRADATION.....	528
4.1. Potential of oilseed radish herbicide competition.....	528

4.2. Allelopathic potential of oilseed radish.....	564
4.3. Effectiveness of weed control using oilseed radish.....	605
List of references for the Chapter 4.....	649

CHAPTER 5. POTENTIAL OF OILSEED RADISH

AS A BIOENERGY CROP	672
5.1. Oilseed radish as a raw material for biofuel production.....	672
5.2. Evaluation of biofuels derived from oilseed radish.....	687
5.3. Oilseed radish as a raw material for biogas production.....	737
List of references for the Chapter 5.....	781

CONCLUSION	298
