

CONTENTS

SECTION I. MONITORING AND RESPONDING TO PUBLIC HEALTH EMERGENCIES

Chapter 1

The impact of adverse social factors on the health of the population: information technology and its practical application (Antomonov M. Yu., Rusakova L. T., Skochko T. P.)	2
1. Information technology as an effective tool for connecting complex systems	3
2. Systematization and generalization of survey data processing methods	11
3. Practical application of information technology to determine changes in the health of the Ukrainian population during martial law	14

SECTION 2. IMPLEMENTATION OF THE STATE MONITORING SYSTEM FOR HEALTH DETERMINANTS

Chapter 2

The role of molecular epidemiology in combating common infectious diseases such as influenza, acute respiratory viral infections, and viral hepatitis at the current stage in the public health system (Khoronzhevska I. S.)	31
1. Molecular genetic monitoring of influenza and SARS viruses among the population for the period 2009–2017 at the regional level (using the example of the Rivne region of Ukraine during the influenza A (H1N1) pdm 09 pandemic and the post-pandemic period)	32
2. Molecular genetic monitoring of influenza and SARS viruses among the population for the period 2018–2023 at the regional level (using the example of Rivne, Kirovohrad, Khmelnytskyi regions of Ukraine during the COVID-19 pandemic)	44
3. Molecular genetic monitoring of hepatitis B and C viruses among the population at the regional level for 2007–2023 (using the example of the Rivne region of Ukraine)	54

Chapter 3

Coordination and implementation of epidemiological surveillance and analysis of viral hepatitis B and C in the Lviv region for the years 2014–2023 (Yukhymchuk Yu. M., Ivanchenko N. O., Ozirkovska M. Ya)	69
1. Viral Hepatitis B and C as a Global Problem Worldwide	70
2. Analysis of Viral Hepatitis B and C Morbidity Rates in Ukraine for the Years 2014–2023.	73
3. Analysis of Viral Hepatitis B and C Morbidity Rates in the Lviv Region for the Years 2014–2023.	75
4. Implementation of the WHO Global Health Sector Strategy on Viral Hepatitis 2022–2030 in Ukraine at the National and Regional Levels	81
5. Implementation of the New WHO Recommendations on the Prevention and Diagnosis of Viral Hepatitis in Ukraine.	84
6. Proposals for Improving the Monitoring and Epidemiological Surveillance of Viral Hepatitis B and C at the National and Regional Levels.	87

SECTION 3. DOMESTIC AND FOREIGN EXPERIENCE IN TRAINING PUBLIC HEALTH SPECIALISTS

Chapter 4

Implementation of MIS in Cherkasy Regional Hospital and practical significance of work at Cherkasy Medical Academy (Vasylenko I. O.)	97
1. Experience in implementing the MIS «MedInfoService» in the radiology department of the Cherkasy Regional Hospital	97
2. Experience in training master's nurses at the Cherkasy Medical Academy.	107

Chapter 5

Experience of international non-governmental organizations in training specialists in the field of public health (Hrechyshkina N. V., Lytvynova L. O., Donik O. M.)	110
1. Education and standards of training personnel in the field of public health	111
2. Formation of a professional community and development of managerial competencies.	119
3. Advocacy, partnerships and intersectoral cooperation	125

Chapter 6

Development of student competencies in the field of rehabilitation: contribution to achieving un sustainable development goals (Hubenko I. Ya., Stepanova H. M., Shevchenko V. V.)	132
1. Theoretical Foundations and Global Experience of Competency-Based Approach in Training Rehabilitation Specialists	133
2. Current State of the Rehabilitation Specialist Training System in Ukraine: Analysis of Educational Programs and Teaching Methodology	137
3. Assessment of Competency Formation Effectiveness and Development Prospects in the Context of Sustainable Development Goals	145

Chapter 7

Formation of Future Nurses' Readiness to Work with the Population in the Field of Public Health (Linievykh K. A.)	156
1. Aspects of forming readiness to work with the population in the field of public health in the educational process of training nurses	157
2. Definition of the Role of the Nurse in the Field of Public Health	161

Chapter 8

Biotechnology in Pharmacy: The Latest Technologies for Manufacturing Medicines and Aspects of Biopharmaceutical Education (Fedoryshyn O. M., Krychkovska A. M., Hubytska I. I.)	169
1. Biotechnology in drug manufacturing (Biopharmacy)	169
2. Pharmaceutical biotechnology as a new educational specialization	178

Chapter 9

Training public health professionals in the system of postgraduate education: the experience of Ukraine and EU countries (Chemerys Yu. O.)	190
1. Theoretical and Methodological Foundations of Training Specialists in the Field of Public Health	192
2. Strategic Recommendations for Reforming Postgraduate Education in Public Health in Ukraine	202

SECTION 4. MENTAL HEALTH

Chapter 10

The characteristics of the cognitive domain of health professionals with different self-esteem and leadership styles

(Hilman A. Yu., Kharchenko O. V.)	212
1. Methods for studying the cognitive domain of health professionals with different self-esteem and leadership styles	214
2. Diagnostics of the cognitive domain of health professionals	216
3. A study of self-esteem and leadership styles in health professionals	223
4. Characteristics of the cognitive domain of health professionals with different self-esteem and leadership styles	228

Chapter 11

The Impact of Social Factors and Lifestyle on the Mental Health of Children During Wartime Aggression

(Hozak S. V., Yelizarova O. T., Stankevych T. V.)	242
1. Lifestyle factors and social determinants as resources and risks for the mental health of schoolchildren during war	244
2. The significance of the obtained results for the public health system ..	248

Chapter 12

Physiological and social factors influencing the psycho-emotional state of university student-athletes (Latina H. O.)

(Latina H. O.)	255
1. Mental stability of higher education students	259
2. Vegetative support of physical performance of athletes and students of higher education institutions	262
3. A method for assessing the emotional stability of female athletes based on heart rate variability indicators	266
4. Method for assessing the general physical performance of individuals aged 19–21 years using heart rate variability indicators ..	269
5. Assessment of vegetative support of the activity of high school students with vegetative-vascular dysfunction when choosing physical activity for classes in a special medical group	273

Chapter 13

Mental health of personnel managing unmanned aircraft systems. Fatigue and prevention of its development in operators are today's realities (Pashkovskiy S. M., Serheta I. V., Koval N. V.) 281

1. Peculiarities of the development of fatigue in personnel managing unmanned aircraft systems. 284

2. Characteristics of control and correction of fatigue in personnel managing unmanned aircraft systems. 287

3. Recommendations for determining fatigue in operators of unmanned aircraft systems under conditions of long-term piloting 290

Chapter 14

Psychological recovery of military personnel who participated in military conflicts: analysis and comparison of international experience (Chorna V. V., Pashkovskiy S. M., Anhelska V. Yu.) 305

1. Programs and models of global experience for the development of a national system of psychological assistance in rehabilitation 307

2. Comprehensive support for veterans in the United States Warrior Care Network (WCN, USA) is an effective program for restoring the mental health of veterans. 308

3. Integrative programs/models of psychosocial rehabilitation/recovery for veterans: examples of Combat Stress (United Kingdom) and Operational Stress Injury Clinics (Canada). 323

4. Israeli program/model of psychosocial support for military personnel and veterans: an integrative approach 328

5. Basic principles of the Israeli system of psychological rehabilitation/recovery of military personnel 331

SECTION 5. PROTECTION OF MOTHERHOOD AND CHILDHOOD

Chapter 15

Prevention of pediatric otorhinolaryngological diseases: transformation of approaches in Ukraine and EU countries (Kostrovskiy O. M.) 354

1. Epidemiological overview of pediatric otorhinolaryngological diseases. 356

2. Modern approaches to the prevention of pediatric otorhinolaryngological diseases in Ukraine and EU countries. 359

3. Overview of European models for the prevention of otorhinolaryngological diseases in children (case studies of selected EU countries). 361

Chapter 16

Reproductive technologies as an instrument for strengthening public health: contemporary challenges and development prospects (Postolenko V. Yu.)	373
1. Theoretical and Methodological Foundations of the Study of Reproductive Technologies	375
2. Reproductive Technologies in Public Health Systems	379
3. Comparative Analysis of Ukraine and EU Approaches	387

SECTION 6. HEALTH PROMOTION

Chapter 17

Implementation of the work of medical service departments in healthcare facilities of Ukraine (Brezytska D. M., Holovnia O. V.)	399
1. Analysis of the regulatory framework	400
2. Prerequisites for the establishment of medical cleaning departments in healthcare facilities in Ukraine	404
3. Suggestions and recommendations regarding best practices for implementing medical service departments in healthcare facilities in Ukraine	407

Chapter 18

Digital transformation of dentistry in the public health system: realities, development vectors and prospects (Varakuta O. A.)	424
1. Current state of digital transformation in dentistry	426
2. Vectors of development of digital transformation in dentistry	433

Chapter 19

Methodological Foundations for Ensuring the Safety and Clinical Effectiveness of Artificial Intelligence Systems in Healthcare (Golovenko M. Ya., Larionov V. B.)	447
1. Integration of AI Systems into Clinical Practice: Risks and Implementation Challenges	450
2. National and International Regulatory Bodies Empowered to Certify Medical AI	454
3. Structured Methodologies for Impact and Risk Assessment	455
4. Benefit–Risk Ratio in Pharmacotherapy and Medical AI: Commonalities and Differences	459

Chapter 20

Modern innovations in healthcare: the future of digital technologies (Hushchuk I. V., Mokienko A. V., Vivsiannyk O. M.) 470

1. Analysis of the current state of the problem 471

2. Characteristics of digital healthcare technologies 475

3. System readiness for digital healthcare: opportunities and challenges 480

Chapter 21

The role of information technology in improving the effectiveness of ophthalmic prevention and public health (Kostrovska K. O.) 494

1. Epidemiological Aspects of Ophthalmological Diseases 496

2. Use of Information Technologies in Ophthalmological Prevention 502

Chapter 22

Digital technologies in the prevention of oncological diseases: contemporary approaches, tools and prospects for development (Merzliak S. V.) 514

1. Theoretical and Methodological Foundations of the Study 515

2. Socio-economic and ethical challenges of using digital technologies in cancer prevention 520

3. Global and Ukrainian Perspectives on Digital Cancer Prevention 524

Chapter 23

Communication management in public health: adapting European approaches in dental practice to the Ukrainian context (Semenov D. M.) 532

1. Theoretical and Methodological Foundations of Communication Management in Public Health 534

2. Dental Practice as a Specific Space of Communication 537

SECTION 7. LEGAL SUPPORT OF THE PUBLIC HEALTH SYSTEM

Chapter 24

Prospects of legal regulation of environmental determinants of health in Ukraine (Ilkiv N. V.) 558

1. Environmental determinants of health in the concept of a “one-size-fits-all approach to health” 559

2. Legal mechanisms of public policy as environmental determinants of health 568

Chapter 25

Cooperation of Healthcare Institutions in the Context of Ukraine’s Integration into the EU: Theoretical and Legal Foundations (Mendzhul M. V., Fetko Yu. I.) 583

1. The Current State of the Issues of Healthcare Institutions Cooperation in the Process of Ukraine’s European Integration 583

2. Legal and Theoretical Frameworks for the Cooperation of Healthcare Institutions in Ukraine 585

Chapter 26

Legal Mechanisms of Vital Safety of Patients and Medical Personnel in the Public Health System of Ukraine and the EU (Yashchuk P. V.) 596

1. Legal Principles and Regulations of Ukraine in the Field of Vital Safety. 600

2. International Legal Standards. 603

3. Legal Mechanisms for Ensuring Vital Safety in the European Union . . 606

4. Comparative Analysis: Ukraine and the EU. 609

5. Challenges and Prospects. 613

SECTION 8. OTHER PUBLIC HEALTH CONCERNS

Chapter 27

THE IMPORTANCE OF CLINICAL THINKING FOR THE PRACTICAL ACTIVITIES OF HEALTH CARE PROFESSIONALS (Marush I. V.) 624

1. Critical thinking as a fundamental philosophical phenomenon of clinical thinking 624

2. Application of clinical thinking in the practical activities of future healthcare professionals. 631

Chapter 28

Dental education of the population as a public health tool (Chertov S. O.) 638

1. Theoretical Foundations of Population Dental Education in the Context of Public Health 640

2. Practical Aspects of Implementing Public Dental Education in the System of Public Health 644
