

CONTENTS

FOOD TECHNOLOGIES

Chapter 13

Innovative technology for processing waste raw materials of plant origin (Holub L. S.)	2
1. Development of technology for extracting protein isolate from pumpkin meal	3
2. Research into the possibility of using protein isolate from vegetable meal as an emulsifier	11

Chapter 14

Comprehensive study of the chemical composition, amino acid profile and histological structure of African ostrich meat (Israelian V. N., Holembovska N. V.)	29
1. Modern ideas about the chemical composition and properties of African ostrich meat	30
2. Methodological foundations of research into the chemical composition and morphofunctional properties of meat	31
3. Comprehensive assessment of the chemical composition, biological value, and functional and technological properties of African ostrich meat	33
4. Histological and morphological features of muscle tissue of ostrich meat	41

Chapter 15

Parapharmaceuticals of plant origin – past and future (Kichura D. B., Subtelnyi R. O.)	48
1. Classification of parapharmaceuticals	50
2. Raw materials for herbal parapharmaceuticals and methods of its extraction	53
3. Antimicrobial substances from plants of certain families and their effect on bacteria of the genus <i>Staphylococcus</i>	61

Chapter 16

Probiotics in health nutrition (Kichura D. B.)	76
1. Classification of probiotics and application	77
2. Antagonistic properties of probiotics	85

Chapter 17

Technology of craft bread with live sourdough (Medvedieva A. O., Antonyuk I. Yu.)	101
1. Analysis of the range of similar products in the craft bread production market	101
2. Consumer characteristics of the gastronomic concept of craft bread	109
3. Development of craft bread technology.	115

Chapter 18

Innovations in Technologies of Freezing and Storing the Fruit-and-Berry Raw Materials Based on Cryoprotection Methods (Simakhina G. O.)	124
1. Scientific Approaches to Select the Most Effective Method of Plant Raw Preservation	125
2. Effectiveness of Cryoprotectant Usage. Scientific and Practical Aspects	130
3. The Model of Organization for an Innovative Enterprise to Produce the Quick-Frozen Fruit and Berry Half Products.	136

ARCHITECTURE AND CONSTRUCTION

Chapter 19

Typological features of observation decks as centers of socio-cultural space of airports (Agieieva G. M.)	147
1. Observation decks as components of the socio-cultural space of airports.	150
2. Factors influencing the formation of observation decks.	152
3. Typological features of observation decks.	154
4. Observation decks in the spatial organization structure of Boryspil International Airport: practice and prospects.	157

GENERAL ISSUES OF ENGINEERING SCIENCES

Chapter 20

Various concepts of using mathematical modeling (Vdovychenko I. N.)	168
1. Mathematical modeling in the modern world	169
2. Analysis of principles and approaches to the use of mathematical modeling	172

Chapter 21	
Entropy-topological approach to modeling complex multicomponent systems (Voloshyn V. S., Klenin O. V.)	183
1. Entropy-topological model of simple two-component systems	184
2. Entropy-topological model of multicomponent complex systems	195
3. Natural and applied value of the model	200
Chapter 22	
The human factor in ensuring the viability and sustainability of complex technical systems (Mygal G. V.)	208
1. Man as a resource for safety, not a source of errors	209
2. Viability of complex technical systems	218
3. Human-Centered Design as an Engineering Methodology for Ensuring Sustainability	227
Chapter 23	
Innovative technical solutions for sustainable development of Ukraine and EU countries: organization of scientific and scientific-technical activities in the military sphere (Khomenko Ye. V., Svietchnyi I. V., Bondar V. Yu., Korotchenko O. O.)	241
1. Organization and implementation of scientific and scientific-technical activities in the U.S. Army Corps of Engineers	243
2. Organization of scientific and scientific-technical activities in the Royal Corps of Engineers of the British Army	250
Chapter 24	
Development of land legislation as a condition for strengthening Ukraine's defence resilience (Sharyi G. I., Kariuk A. M., Mishchenko R. A.)	270
