Baltija Publishing, 2026. 464 p.

ISBN 978-9934-26-694-2

DOI 10.30525/978-9934-26-694-2

The monograph is devoted to the topical issues of systematization and development of Ukrainian legislation in the context of contemporary challenges and taking into account European experience. Particular attention is paid to the theoretical and methodological foundations of law-making activity and systematization of Ukrainian legislation, the features of the system of normative-legal acts of Ukraine in the mechanism of legal regulation of public relations, particular forms of the systematization of legislation, as well as European and international legal factors of the systematization of Ukrainian legislation. A number of proposals are formulated for improving the law-making process and ensuring the consistency of Ukrainian legislation in the context of European integration. The monograph partially incorporates the findings and conclusions presented in the collection of research papers "Systematization of Ukrainian Legislation as an Important Component of Law-Making Activity in the Context of European Integration", prepared by researchers of the Institute of Law-Making and Scientific-Legal Expertise of the National Academy of Sciences of Ukraine in 2024. The publication is addressed to academics and scientific-pedagogical staff, doctoral students, postgraduate students, practicing lawyers and anyone interested in topical issues of law-making activity.
