

CONTENTS

INNOVATIVE ASPECTS OF THEORETICAL AND EXPERIMENTAL CHEMISTRY

Chapter 22

The historical development of photoredox catalysis

(Bahirov E., Lampeka R.)	2
1. Origins of photoredox catalysis (1888–1977).	2
2. Establishment of photoredox catalysis (1978–2007).	10
3. Modern development of photoredox catalysis (2008–2026).	16
4. Development of mesityl-acridinium photosensitizers in photocatalysis	26
5. Synthesis of N-alkyl and N-aryl acridinium salts	29
6. Potential application of the new acridinium photocatalyst	31

Chapter 23

Diffusion-ordered NMR spectroscopy (DOSY) in the analysis

of multicomponent mixtures (Hreben M., Lampeka R.)	45
1. Practical applications of DOSY in the analysis of complex systems	47
2. Environmental science and contaminant dynamics	51
3. Multidimensional 3D-DOSY spectroscopy	52
4. Experimental part	54

Chapter 24

Chemical foundations of Ukraine's sustainable development in the context of green energy and industrial decarbonization

(Kochubei O.)	62
1. Chemical foundations of Ukraine's green energy.	63
2. Chemical technologies for the decarbonization of Ukraine's industry.	73

Chapter 25

Performance properties and biodegradation of bioplastic film materials (Krykhovets O.)

	85
1. Materials and methods	90
2. Results and discussion	92

Chapter 26

Computational continuum-methods for studying chemical problems in solution (after J. Tomasi) (Tokar A.)

	106
1. Computational methods for describing liquids. Fundamentals of continuum solvation methods and components of solvation energy	108
2. Extension of the model to study chemical processes in solution. Interpretation of the internal reaction mechanism	115

Chapter 27

Environmentally benign strategies for the synthesis and functionalization of imidazolidine-based systems (Kharchenko Yu.)	127
1. Sustainable synthetic strategies for imidazolidine-based systems	128
2. Structure–reactivity relationships and green functionalization	141
3. Applications and industrial feasibility	144

PHYSICAL GEOGRAPHY, SOCIO-GEOGRAPHICAL TRANSFORMATIONS OF TERRITORIES, AND SPATIAL MODELLING

Chapter 28

Ecological and geographical foundations for the sustainable development of national nature parks in the Ukrainian Carpathians (Basiuk T., Romaniv A.)	153
1. Formation and current state of the national nature park network in the Ukrainian Carpathians	154
2. Ecological risks and anthropogenic transformation of mountain landscapes	158
3. Optimization of spatial structure and innovative management of protected areas	164

Chapter 29

Political and geographical dimensions of Norway's sustainable development under the transformation of resource and environmental policy (Braslavska O.)	173
1. Geographical, institutional, and resource-economic dimensions of Norway's sustainable development	174
2. Environmental policy, territorial conflicts, and prospects for Norway's sustainable development	180

Chapter 30

Geographical patterns of post-war reconstruction in Germany: urban planning decisions (Gukalova I.)	188
1. Spatial destruction and the preconditions for recovery	188
2. The case of the Federal Republic of Germany	194
3. The case of the German Democratic Republic	197

Chapter 31

Mining waste management in Lviv region: problems of accumulation and efficiency of use (Ivanov Ye., Voitkiv P., Kornus A.) 206

1. Environmental problems associated with the accumulation and using mining waste 209
2. Volumes of mining waste accumulation 212
3. Efficiency of mining waste use 220

Chapter 32

The subjective dimension of financial sustainability and quality of life in the communities of Chernivtsi Oblast (survey results) (Kurysh T.) 229

1. Methodology for conducting a subjective study of financial sustainability and quality of life of the region's population 231
2. Empirical analysis of the financial sustainability and subjective assessments of quality of life of the population of Chernivtsi Oblast . . . 234

Chapter 33

Public reporting in urban water supply: a case study of district centres in Poltava region (Lutsoviat A.) 255

1. Public information in the system of sustainable urban water governance 256
2. Data, criteria and methodology of the comparative documentary audit 260
3. Audit results and comparison of data aggregation methods 265

Chapter 34

Overlay analysis of planform channel changes of the Prut River in the foothill reach and their practical significance (Pasichnyk M., Hryhoriichuk V., Martynova Khavruniak A.) 274

1. Physico-geographical conditions of the Prut River basin and theoretical foundations for the study of channel processes 276
2. Software and cartographic-information support of the research 307
3. Channel planform changes of the Prut River within the study reach . . . 333
4. Water intake structures under conditions of channel planform changes of the Prut River 350

Chapter 35

Spatial and temporal distribution of ice-frost deposits of the categories DP (dangerous phenomena) and SHP (spontaneous phenomena) in Ukraine during 2021–2025 (Pyasetska S.)	363
1. Ice deposits of the categories DP (dangerous phenomena) and SHP (spontaneous phenomena)	367
2. Wet snow deposits of the categories DP (dangerous phenomena) and SHP (spontaneous phenomena)	373
3. Cases of complex deposits of the categories DP (dangerous phenomena) and SHP (spontaneous phenomena)	379

MODERNISATION OF NATURAL SCIENCE EDUCATION: METHODOLOGICAL INNOVATIONS AND PRACTICAL EXPERIENCE

Chapter 36

The use of artificial intelligence in the practical training programme for the educational component “Educational Fieldwork in Natural History and Local History” (Budnik S.)	391
1. Academic approaches to the use of artificial intelligence in modern education	392
2. Artificial intelligence as a means of modernising the educational component “Educational Fieldwork in Natural History and Local History”	394
3. Methodology for organising educational fieldwork in natural sciences and local history using artificial intelligence technologies	399

Chapter 37

Ecocentrism and valeological culture in the modern educational space (Buzenko I., Zelenenka I., Parchevska A.)	409
1. Peculiarities of the formation of the eco-educational terminological system and eco-culture of education seekers	412
2. Ecovaleological competencies and their relevance: educational ecocentrism and global ecodiscourse	415
3. The problem of algorithmization of eco-valueological competencies	418

Chapter 38

Mind mapping as a tool for developing students’ cognitive strategies in biology and chemistry classes (Hirya O.)	427
1. Mind mapping and cognitive learning strategies for students	428
2. The impact of mind mapping on the development of students’ individual cognitive strategies in biology and chemistry classes	436

Chapter 39

Research on the features of teaching natural sciences in distance learning (Diuzhykova T., Chetvertak T., Barus M.)	448
1. Theoretical basis of teaching natural disciplines	449
2. Features of teaching natural disciplines in distance learning	452
3. Practical aspects and recommendations	454

Chapter 40

Results of studies on hydrogeological and geodynamic conditions in ecologically hazardous regions and their application in the study of natural sciences (Ihnatyshyn V.)	460
1. Some features of basic geography education at the present stage and prospects for its development	461
2. Analysis of publications addressing issues related to geodynamic, seismological, and geographical processes in the region	462
3. Study of hydrological conditions in the central part of the Transcarpathian Interior Trough for the year 2024. Variations in precipitation	468
4. Variations in precipitation in the Transcarpathian Interior Trough and current horizontal movements of the region's crust for the year 2024 (based on the results of geophysical monitoring at the region's operational geophysical stations)	475

Chapter 41

Organizational and pedagogical conditions for creating a healthy environment in preschool education (Kalichak Yu.)	487
1. Components of the category "health-preserving environment"	488
2. Prerequisites for creating a health-preserving environment in preschool institutions	492
3. Practical recommendations for teachers	496

Chapter 42

Environmental and project-based activities in the school geography curriculum: theoretical and methodological foundations and digital tools for implementation (Nepsha O., Hryshko S., Levada O.)	511
1. Theoretical and methodological foundations for organising environmental project work within the school geography curriculum	512
2. Methodological support for environmental project-based learning in the school geography curriculum using digital technologies	520

Chapter 43

Soil-ecological research in the training of geography specialists as a basis for sustainable territorial development (a case study of the Transcarpathian Lowland) (Saliuk M., Mykyta M.) 534

1. Soil cover of the Transcarpathian Lowland: genetic-geographical and ecological-functional characteristics. 536
2. Transformation of land-use approaches and organization of soil cover monitoring in the region. 541
3. Practice-oriented training of future geography specialists based on soil-ecological monitoring 547

Chapter 44

Professional language training of natural sciences students: ESP and English-medium instruction models (Semak O., Semak U.) . . 560

1. General theoretical foundations of teaching a foreign language for professional purposes to natural sciences students. 563
2. Two methodological models for delivering professional language training 565
3. Empirical grounding and the Ukrainian institutional context 571

Chapter 45

Nature subject English tasks for future agronomists, ecologists, land managers, power engineers and coaches (Yakushko K.) 577

1. Nature subject English tasks for future agronomists and ecologists. . . . 578
2. Nature subject English tasks for future land managers and power engineers. 580
3. Nature subject English tasks for future sport instructors. 586
